Full-Stack & AI Engineer | Solo LMS & Commerce Architect

naymulislam241@gmail.com | github.com/nymulislam (84+ repos) | linkedin.com/in/nymulislam

Full-Stack Software Engineer & Solo LMS Architect based in Dhaka, Bangladesh. Experienced in designing, building, and operating end-to-end web systems using Next.js (App Router), TypeScript, the MERN stack, and deterministic Agentic AI workflows.

CORE TECHNICAL ARCHITECTURE & STACK

Frontend & SSR: Next.js (App Router), TypeScript, React 18, Tailwind CSS, State Architecture, Accessible UI
Backend & Data: Node.js, Express.js, MongoDB (Atomic Concurrency), REST APIs, Session & RBAC Auth
AI & Tooling: Agentic AI Workflows, Gemini API Function Calling, Structured JSON Schemas, Git, Vercel, Linux

EXPERIENCE & CAREER TRAJECTORY

Solo Full-Stack & LMS Architect - LearnHikmah (Remote | Dhaka) — 2024 - Present

Stack: Next.js | TypeScript | Node.js | RBAC

- Architected and shipped both the public education portal (learnhikmah.com) and the private organization LMS (app.learnhikmah.com) solo from scratch.
- Engineered role-based access control (RBAC) across student, instructor, and admin views with atomic lesson progression tracking.

Full-Stack & AI Systems Engineer - Independent & Open Source (Dhaka) — 2023 - Present

Stack: React | Next.js | Express | MongoDB | Agentic AI

- Built and deployed 84+ repositories spanning full-stack MERN commerce (E-Page), healthcare & recruitment platforms (IlmMed, Job Heaven), and developer tools.
- Designed deterministic LLM tool-calling workflows using structured JSON schemas and low-latency API orchestration.

Classical Arabic Logic (Mantiq) & Jurisprudence - Jamia Rahmania Arabia (Dhaka) — Foundational Training

Stack: Formal Logic | Nahw/Sarf | Analytical Systems

- Completed rigorous training in classical Arabic grammar (Nahw/Sarf), formal syllogistic logic (Mantiq), and close textual analysis.
- Translated classical rule-based reasoning directly into strict TypeScript contracts, state machines, and clean software boundaries.

SELECTED PRODUCTION SYSTEMS & ARCHITECTURE

LearnHikmah Platform (learnhikmah.com) | Solo Architect | Next.js | TS | Tailwind
Public education and community portal engineered solo. Built for fast global reading with server-rendered pages and clean typography. Outcome: Sub-50ms edge cached course catalog & mobile-first reading layout.

LearnHikmah LMS (app.learnhikmah.com) | Solo Full-Stack | Next.js | Node | RBAC
Dedicated learning management system in a private organization. Handles student dashboards, lesson progression, and role-based permissions. Outcome: Strict role isolation across students, instructors, and admins.

E-Page Commerce (e-page.vercel.app) | Top Pinned | React | Node | MongoDB
Full-stack MERN bookstore featuring instant catalog filtering, reactive cart persistence, and a friction-free checkout pipeline. Outcome: Race-condition-free inventory mutations & instant search filtering.

IlmMed & Web Suite (ilm-med-solution.vercel.app/) | Web Suite | React | Express | REST
Production web suite spanning healthcare services (IlmMed), recruitment workflows (Job Heaven), and interactive catalog apps. Outcome: Clean component boundaries & resilient API error handling.

Open to Full-Stack & AI Engineer roles (Remote or Dhaka) | Full CV Online: https://t.ly/aR09W
